Industrial Manipulators

Dalmeccan solutions for the “weightless” gripping and handling of products and materials used into the food industry.

Simple to use, they allow the operator to move the different products into the working area quickly, accurately and safely.

These Manipulators are also made of stainless steel with specially adapted design, dimensions and gripping systems to suit the specific requirements of the users and the different environmental conditions available.

9918807

PSC type Partner Manipulator, column mounted, equipped with a suction cup tool for handling cheese in the cleaning area.

9917442

Particular stainless steel hook for cheese.

0426814

Forks stainless steel gripping system for "salami" support bars.

0324873

FOOD

1139439

Partner type Manipulators overhead trolley mounted for handling carton boxes.

The Partner due to its versatility and efficiency can be equipped with special toolings with one or more suction cups designed for a quick and safe gripping and handling of carton boxes of different type and dimension.

If necessary, the gripping tool can be equipped with a pneumatic jaws gripper.

0121345

0121347

0325746

0122355

0122817

Some examples of devices for gripping and handling barrels and drums.

The Partner is the ideal instrument for handling paper and polythene bags of any dimension up to 50 kg.

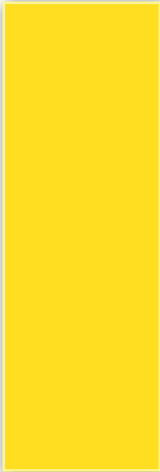

The gripping is made simply by positioning the suction plate on the bag and load balancing is automatically inserted. Also the bag release is simple and quick.

Different solutions for handling juta or raffia bags are also available.
