Industrial Manipulators

Dalmeccan offers a wide range of manipulators, fitted with custom-built tooling for the "weightless" handling of foundry products.

Simple to use, they allow the operator to move products quickly, accurately and safely within the operating area.

The type, design, dimensions and picking systems incorporated in these manipulators are tailored to suit the specific requirements of the user and the varying environmental conditions available.

FOUNDRY

PMS type Partner manipulator, overhead trolley mounted version, with pneumatic jaws for picking casting dies.

PMS type Partner manipulator, overhead trolley mounted version, fitted with fork tooling for handling ladles or crucibles.

Manipulator equipped with a pneumatic gripper for picking and handling aluminium parts.

Manipulator with pneumatic gripping jaws for picking and emptying ladles.

PVS type Posivel manipulator, overhead trolley mounted version, equipped with gripper picking system for moving core boxes. 0630744

PMC type Partner manipulator, column mounted version, equipped with tooling for handling cast-iron covers. 17307

Manipulator with gripper tooling for picking and tipping casting cores. 9715507

Manipulator with tooling for picking alloy rings, with manual rotation. 9816111

1037658

PMC type Partner manipulator, column mounted version, with tooling for handling castings.

9715743

Manipulator equipped with gripper tooling for handling refractory plates.

0833933

PMC type Partner manipulator, column mounted version, equipped with gripping jaws for moving incandescent parts.

0630034

9715741

Manipulator with grippers for picking and handling cores of different dimensions.

1139160

Manipulator with gripping jaws for picking and handling melted ingots.

9816511

Manipulator equipped with a pneumatic gripper tooling for picking and handling parts of boilers.

9917735

Manipulator equipped with a pneumatic gripper tooling for picking and tipping casting dies.
