REELS

Industrial Manipulators

Dalmeccan offer a wide range of manipulators, designed and manufactured for the "weightless" handling of reels and bobbins.

Simple to use, they allow the operator to move reels quickly, accurately and safely within the operating area.

The type, design, dimensions and picking systems incorporated in these manipulators are tailored to suit the specific requirements of the user and the varying environmental conditions available.

REELS

0427543

Manipulator with vacuum suction head and pneumatic 90° inclination for handling reels of cardboard. Vacuum is generated by a multi-stage "Venturi" type ejector.

B03

PSC column mounted Partner manipulator, standard hook unit fitted with sling by the customer for handling reels.

0019841

PMS type Partner manipulator, overhead trolley mounted unit, with pneumatic power drive, designed for lifting reels of plastic film from a cradle to a pallet. The tooling head consists of a pneumatically expanding mandrel with 90 degree pneumatic inclination.

0731884

MXC column mounted manipulator custom-built for lifting reels of plastic film from a cradle to a pallet. Expanding mandrel for the pneumatic rotation of reels.

B06

Manipulator with tooling for handling rolls of rubber from a packaging line to a pallet, made up of a pin which is inserted into the core of the roll.

0733406

PMC type Partner manipulator, column design, provided with gripper tooling for picking and unwinding reels of plastic film from a cutting machine. With pneumatically assisted rotation through an angle of 90°, the individual reels are then positioned vertically on the pallet.

0223717

Manipulator with adjustable forks type tooling for handling of reels.

1139177

PMC column-type Partner, with pneumatic gripping jaws for handling rolls about their external diameter.

0936752

MXC type "Maxipartner" manipulator, column mounted version. The tooling consists of an expanding mandrel complete with a pneumatic 90° inclination system.

REELS

REELS

B11

MXC type "Maxipartner" manipulator, column mounted. The tooling is equipped with an expanding mandrel, 90° pneumatic inclination and also an anti-telescoping device.

B12

PMC type Partner manipulator, column mounted, fitted with pneumatic mandrel tooling for gripping in the reel's core and 90° inclination. The unit is used for palletizing reels.

0936604

PMC type Partner manipulator, column mounted, with self-centering grippers for moving reels of plastic film. The tooling head is designed to pick horizontal reels from a winding shaft and then place them vertically to an adjacent pallet. Rotation is actuated pneumatically.

B14

PMS type Partner manipulator, overhead trolley mounted, with pneumatic trolley drive, designed for the handling of reels of cardboard. The tooling comprises a suction head designed to pick reels from the floor and place them to the shaft of an unwinding machine. The vacuum is generated by a vacuum pump.

REELS

Manipulators fitted with gripper tooling for handling reels about their outside diameter, with pneumatic 360° rotation.

PMC type Partner manipulator, column mounted, with gripper tooling, for handling reels about their external diameter, with 360° manual rotation.

Manipulator with "Venturi" suction cups tooling for gripping reels, with manual rotation from horizontal to vertical.

Manipulator with expanding mandrel for picking, inclination and manual rotation of reels.

Manipulator with "Venturi" vacuum suction ring and 90° pneumatic inclination.

Gripping system with double mandrel with pneumatic inclination.

Gripper tooling.

Mandrel gripping system of two reels with pneumatically adjustable center distance.

REELS

9917991

Manipulator fitted with expanding mandrel and anti-telescoping device. The tooling also incorporates 90° pneumatic inclination.

0936593

Manipulator fitted with pneumatic grippers for handling reels about their outside diameter.

0427543

Manipulator with suction cups tooling for gripping and 90° manual inclination of little rolls. Vacuum is generated by a multi-stage "Venturi" type ejector.

1037773

Forks type tooling for handling reels.

0325221

Adjustable jaws tooling for handling reels and their packaging.

0529305

Gripping tooling with pin for handling and winding rolls.

0020390

Expanding mandrel for the pneumatic rotation of reels.

B22

Manipulator with pneumatic gripping jaws for the easy picking of stacked reels about their external diameter.

9918400

Manipulator complete with pneumatic gripper for picking and handling carrier shafts.

0631283

0834222

9918023

PMC type Partner manipulators, column mounted, complete with pneumatic gripper for picking and handling reel-carrier shafts.
