TRANSMISSION SHAFTS

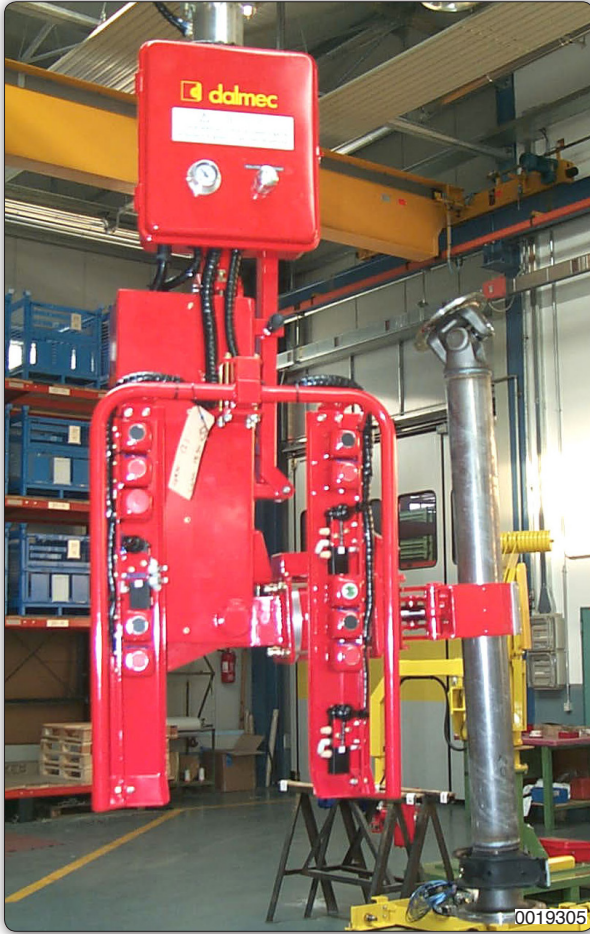

Industrial Manipulators

Dalmeccan offers a range of tooling heads for the “weightless” handling of transmission shafts.

Simple to use, they allow the operator to move the transmission shafts quickly, accurately and safely throughout the working area.

These manipulators have been custom-built, with specially adapted design, dimensions and picking systems to suit the specific requirements of the users and the various environmental conditions available.

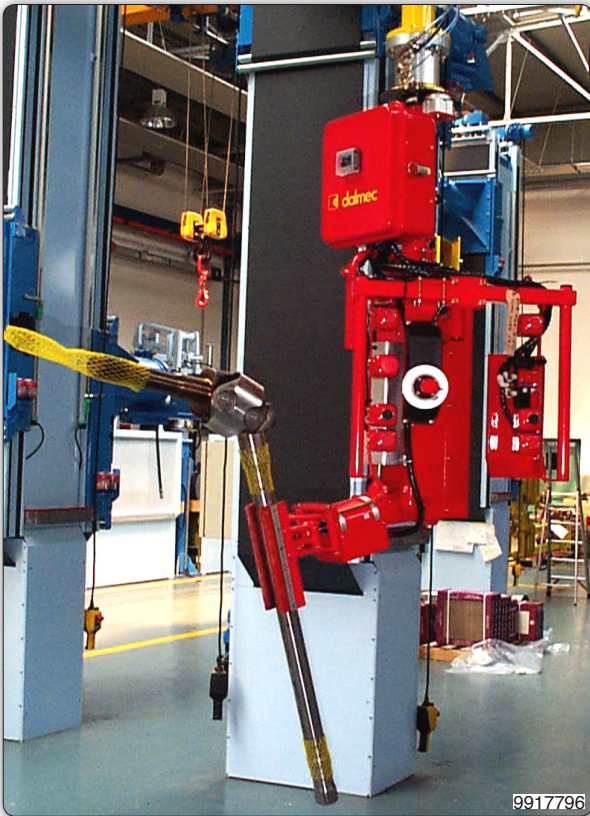

TRANSMISSION SHAFTS

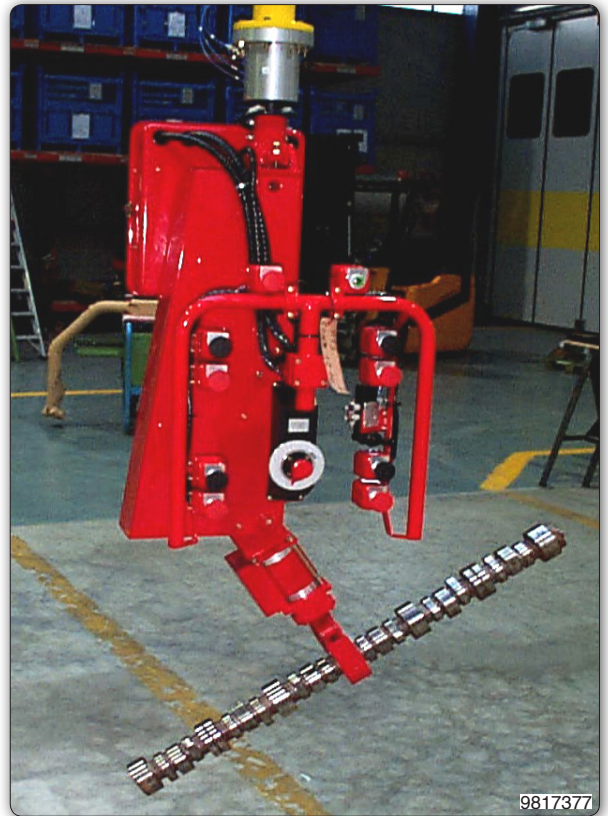

Manipulator with jaws tooling for gripping and rotation of transmission shafts.

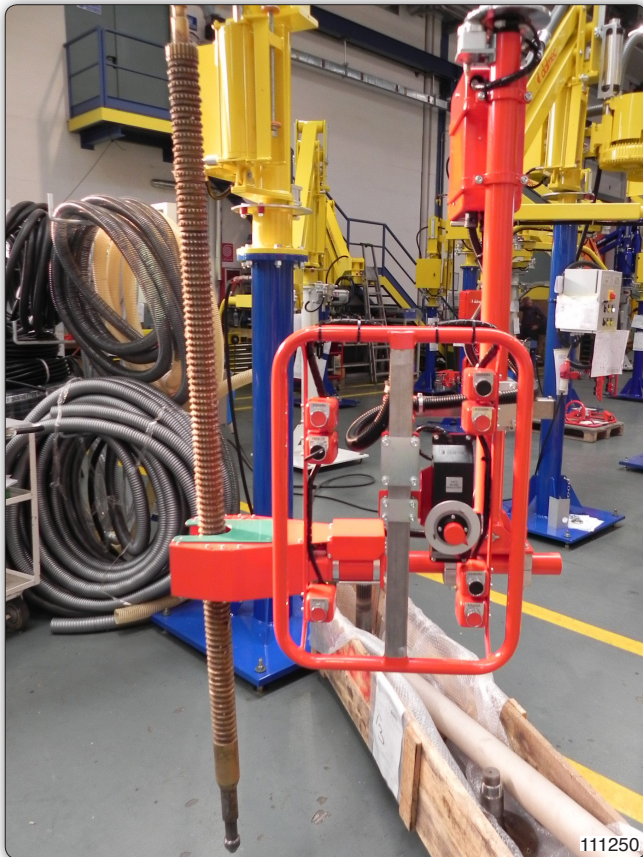

Manipulator with pneumatic tooling for gripping, inclination and rotation of transmission shafts.

Manipulator with pneumatic tooling for gripping, inclination and rotation of transmission shafts.

Manipulator with pneumatic tooling for gripping and inclination of mechanical shafts.

111250

Manipulator with pneumatic tooling for gripping and handling shafts.

9918107

Manipulator with adjustable jaws and double gripping head tooling for handling transmission shafts.

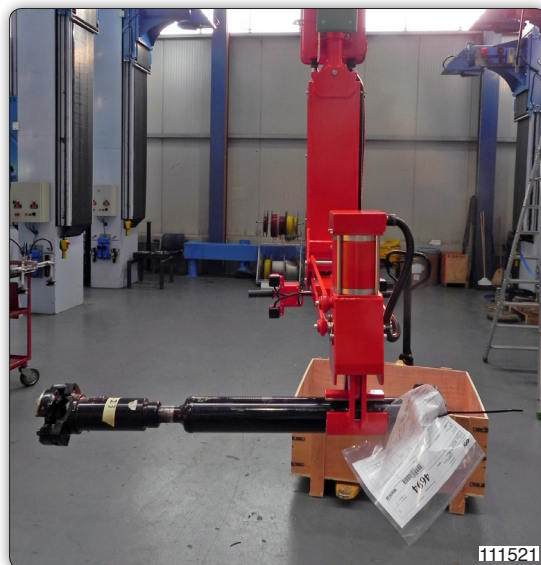

0732506

Manipulator with double gripping head tooling for gripping and handling transmission shafts.

9816034

Manipulator with pneumatic tooling for gripping and rotation of transmission shafts.

111521

Manipulator with pneumatic tooling for gripping and inclination of shafts.
