9817065

9917666

0835294

PSS type Partner manipulator, overhead trolley mounted version in Dalmecc track. The operator picks bags from various pallets in the "picking" area and deposits them to a common pallet.

0732891

Partner manipulator, column mounted, equipped with suction head to pick bags from a pallet and loading them to a mixer.

0631478

Partner manipulator, column design, special low profile unit, to enable to operate in a room with low ceiling. The equipment allows the bags to be picked from a pallet and to be loaded onto a hopper.

S07

Suction device made of stainless steel.

0935917

Higher and lower dual commands.

0631405

Posifil manipulator, column design, used to handle bags from the pallet to the hopper. Vacuum is generated by a multi-stage Venturi type ejector.

0629877

PSF type Partner manipulator, fixed version, used to move bags from a sack filler to a pallet.

PSC type Partner manipulator, column mounted, with suction head for handling rubber bales used for a trituration plant, equipped with an "extra pull" feature to facilitate detachment of the bale from the one underneath it.

Tooling head for handling rubber bales with independently swivelling suction cups.

Partner manipulator, column mounted, with suction cups tooling for handling vacuum-packed forage. The tooling is equipped with telescopic controls.

Manipulator with pneumatic jaws for handling rubber bales. The "slimline" design of the jaws allows for easy release into the bale's packaging.

Manipulator with pneumatically actuated grippers, for handling jessian sacks containing coffee, cocoa and similar products.

Manipulator with pneumatically actuated gripper picking system.

Manipulator with pneumatically actuated gripper picking system.

Manipulator with pneumatic clamping grippers which allows the bags to be inclined from the horizontal to the vertical and vice versa.

Manipulator with retractable hooks for handling hessian sacks.
