

INDUSTRIAL MANIPULATORS

DALMEC - REELS

1445931

Partner Manipulator, overhead version, provided with pneumatic jaws for gripping rolls about their external diameter with 180° pneumatic rotation.

1138399

Manipulator with suction cups tooling for gripping and 90° inclination of reels. Vacuum is generated by a multi-stage "Venturi" type ejector.

0630809

150565

150561

1342459

Partner manipulator, column mounted, designed for lifting reels of plastic film from a shaft to a pallet. The tooling head consists of an expanding mandrel with 90° pneumatic inclination.

0936540

Gripper tooling, designed for picking and handling reels of different shapes, weights and sizes. In particular, the tooling enables to grip the reel about its external diameter and to place it in its packaging.

B06

Manipulator with tooling for handling rolls of rubber from a packaging line to a pallet, made up of a pin which is inserted into the core of the roll.

0529145

Manipulator with adjustable forks type tooling for handling rolls of plastic film.

0732962

Partner manipulator, overhead trolley mounted version to run in an aluminum tracking system. The tooling is made up of a pin suitable for handling rolls of cloth.

0630961

Partner manipulator, column mounted, provided with a gripping tooling with pin for handling big reels.

0630375

0936752

MXC type Maxipartner manipulator, column mounted version. The tooling consists of an expanding mandrel complete with a pneumatic 90° inclination system.

Partner manipulator, column mounted version. The gripper tooling is provided with interchangeable jaws for handling reels about their external diameter with different dimensions and it is equipped with a pneumatic system for the 90° inclination.

Partner manipulator, column mounted version, fitted with pneumatic mandrel tooling for gripping in the reel's core and 90° inclination. The unit is used for palletizing reels.

Partner manipulator, column mounted version, with self-centering jaws for the handling of paper reels. The equipment is designed to pick horizontal reels from a winding shaft and then place them vertically to an adjacent pallet. Rotation is actuated pneumatically.

Partner Manipulator, column mounted version, suitable for the handling of reels. The tooling consists of an expanding mandrel mounted on a parallelogram, suitable for gripping the reel in its core. The system enables to increase the vertical lift allowing the stacking of the reels.

PEC type Partner manipulator, column mounted, with gripper tooling, for handling reels about their external diameter, with 360° manual rotation.

Manipulator with Venturi suction cups tooling for gripping reels, with manual rotation from horizontal to vertical axis.

Manipulator with suction cup tooling (Venturi) for gripping and 90° pneumatic inclination of reels. The suction cup is ring shaped.

Manipulator with ring-shaped suction cup for gripping and 90° pneumatic inclination of reels.

Manipulator equipped with magnets tooling for gripping and 90° inclination of rolls of metallic banding.

Gripping jaws tooling.

Pinch jaws gripping system for copper tubing rolls.

0529305

MXC type Maxipartner manipulator equipped with pin for handling rolls of cables.

0936593

Manipulator equipped with gripper tooling, for handling reels about their external diameter, with pneumatically assisted rotation through $\pm 90^\circ$.

1037773

Forks type tooling for handling reels.

1037773

0325221

Adjustable jaws tooling for handling reels and their packaging.

150451

Mandrel gripping system equipped with pusher to facilitate the release of the reel.

1342525

PEC type Partner manipulator, column mounted. The tooling consists of an expanding mandrel and it is equipped with a pneumatic system for 90° inclination and also with an anti-telescoping device.

151448

Manipulator equipped with expanders for gripping two spools simultaneously.

9918400

Manipulator equipped with pneumatic gripper for picking and handling carrier shafts.

0631283

0834222

9918023

1037650

Partner manipulators, column mounted, complete with pneumatic gripper for picking and handling reel-carrier shafts.

REEL-CARRIER SHAFTS

0631283

0426898

1343366

1240455

1547361

Partner manipulators, column mounted, complete with pneumatic gripper for picking and handling reel-carrier shafts.
